Good afternoon Gary,

During our visit to the Site, Bill and I received a lot of questions concerning the chronology of EPA's actions on site. Please see the attached PowerPoint slide. It is a general timeline addressing actions taken once the EPA and yourself became the lead on the cleanup.

I referenced POLREPS and Actions Memos from your OSC site to obtain the information. I have three unknown dates (UNK) that I need your best guess on. Also, please edit for content and provide input on additional actions/dates that should appear on the timeline. I will adjust formatting and all of that later...just need your notes.

The intent is to provide an reader friendly product to show residents who confuse our actions with TCEQ or organizations who were on site prior to 2014. Thanks for your help!

Respectfully,

Joan Drammeh
